

Quality Policy Statement

Eirdata

No.	001
Revision	5
Date	24/02/2026

ESS are leaders in Asset Management & Maintenance Reliability through people, systematically implementing lasting improvements for our customers.

Eirdata is a progressive service provision company offering specialist services such as cleanroom validation, commissioning, compliance, HVAC systems, Indoor Air Quality & Building Wellness. Through our network of highly qualified and trained employees and contractors, we provide prompt, reliable and cost-effective service solutions to customers across a diverse industry sector.

As a group, our objective is to understand the real-life needs of our customers and then meet and exceed those needs by offering a service, which provides total flexibility and control, thus matching the precise and dynamic needs of our customers.

We recognise Quality as an essential element in successfully managing our organisation, enabling us to support continuous improvements by constantly analysing our strengths and weaknesses within the organisation.

We are committed to continuously investing in the resources and training necessary to enable us to operate and maintain the ISO9001 Quality Management System. We will ensure that the relevant records are kept and maintained showing that the quality system is managed effectively.

We communicate our quality message to all our employees through our induction process and is also available to all interested parties on our website.

Consistent with this policy, business objectives are established, and we ensure that we meet these objectives through our internal audits and by reviewing at our Business Performance Review meetings.

We will review our Quality Policy Statement for continuing suitability and relevance to current business practice at our Business Strategy meetings.

Bernard Yore
CEO of ESS Group
